HOPLEYS
Skilled General Fabricators

FABRICATORS

hopleys
Metal Building Products
Sheetmetal Fabricators

'Hopleys can manage projects of any budget and scale'

COMPLETE SERVICE

In over 75 years of operation Hopleys has earned a solid reputation for excellence in general fabrication and engineering. With our extensive range of in-house manufacturing processes and experienced staff, Hopleys has the capacity to manufacture almost anything in steel or sheetmetal from assisting with design to final assembly.

Some of our in-house facilities include brake pressing to 200 tonnes, guillotining to 10mm mild steel, lasercutting to 20mm

mild steel, turret punching, spot welding, rolling, MIG and TIG welding, general machining and other general fabrication processes.

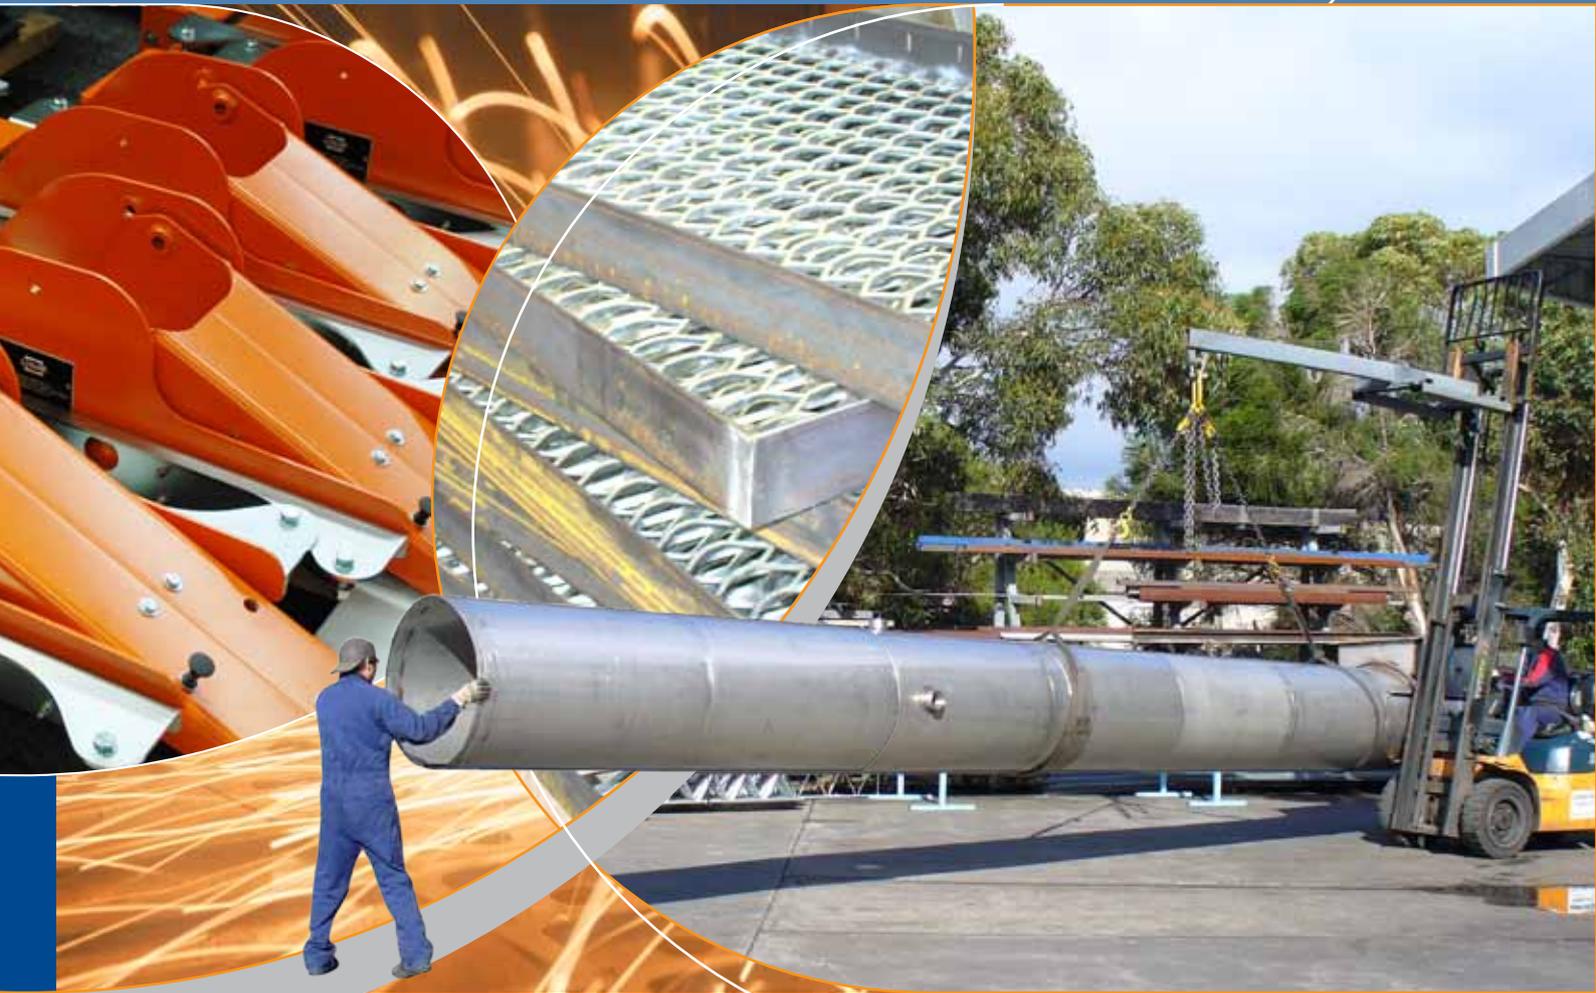

Our experienced team can also arrange any surface finishing that may be required, from zinc plating to galvanising to painting. We have our own delivery service available for those urgent deliveries and have developed strong relationships with outside transport companies who can look after all your other delivery requirements.

We have the ability to manufacture small volume runs as well as larger volumes to suit your lead times.

***Skilled,
Versatile,
Diversified***

'Hopleys can bring a wealth of experience and skills to your project'

With qualified boiler makers, fitter & turners, sheetmetal workers and welder/fabricators, Hopleys are able to fabricate virtually any project to your specifications, meeting your lead times and budget.

Having such a broad range of technically proficient tradespeople also enables us to easily change tack and

customise a project to your needs.

The major benefit of choosing Hopleys to manufacture your products is the wealth of experience and skills our company can bring to your project.

Hopleys staff are always keen to get the customer involved

in the project. Working closely with you during all stages from original concept, through design, budgeting and prototypes to full production runs.

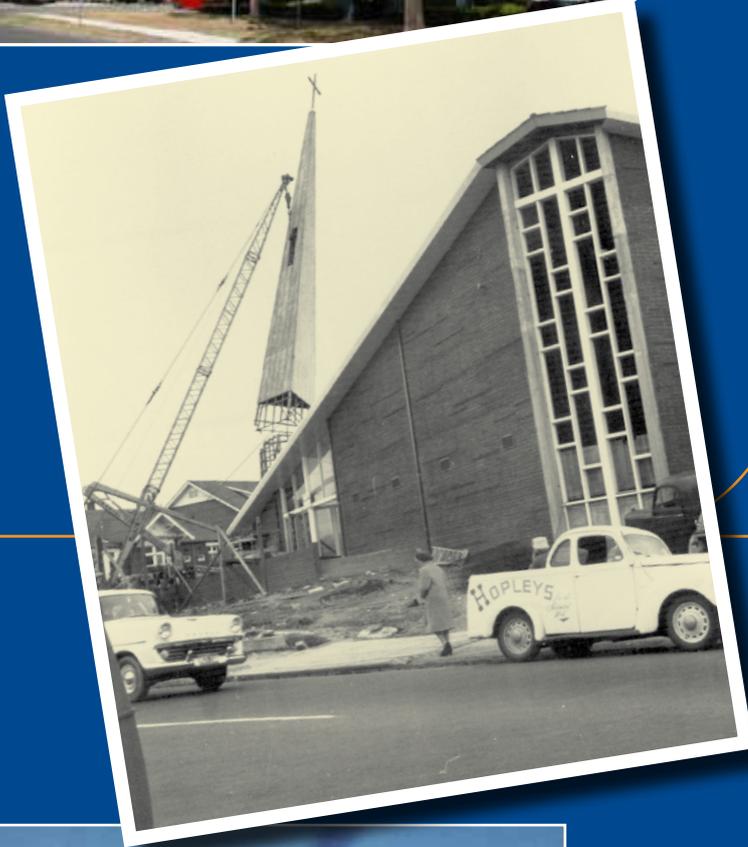

Our door is always open, we'll be working together.

EXPERIENCED TRADESPEOPLE

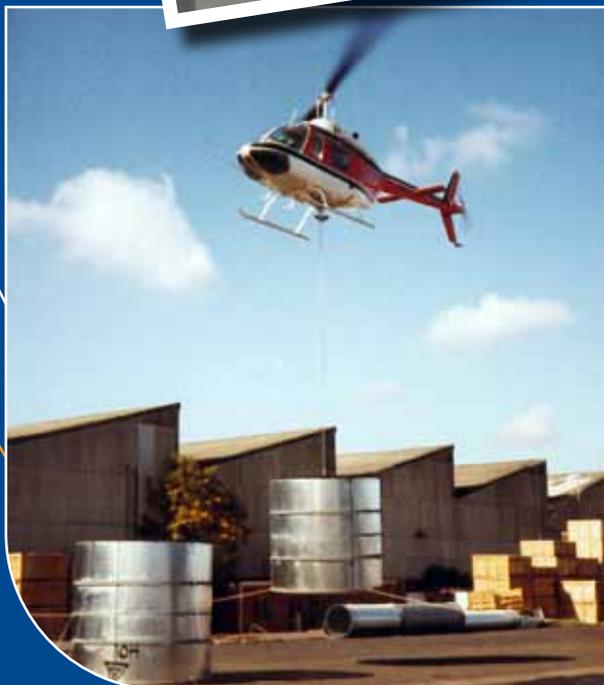

'Hopleys manufacture almost anything in steel or sheetmetal'

'Hopleys has over 75 years experience and a respected reputation in general fabrication and engineering'

Hopleys Sheetmetal was founded in 1931 by Fred Hopley. From its early beginnings in Brunswick, to our current facility in Dingley, Hopleys undertook a variety of fabrication work, particularly in ventilation and signage, but have always been involved in many different types of projects.

This general theme of variety and willingness to become involved in a very broad range of processes and services has been continued and enhanced over the years. The result today is our manufacturing facility of almost 4000 square metres that is able to offer its customers an extensive range of processes using the very latest technologies.

ESTABLISHED 1931

We have always prided ourselves on our ability to cover virtually all manufacturing processes from assisting with the design, prototypes, small to large volume manufacturing, various surface finishes and even final assembly.

Our manufacturing facility is very diverse and as such our staff are flexible and able to employ various different skills as required. We have a wide range of skills within the company which enable us to work with many different materials the most common include mild steel, aluminium and stainless steel.

Through our diversity we have developed parts of our business into specific areas which combined now create Hunt Engineering and Staff P/L. These areas include Tank Industries who offer a range of water storage tanks to fire and water authorities, Hunt Lasercut who provide contract lasercutting to almost all parts of industry and Hopleys Joist which manufactures a range of open web joist to the building and construction industry.

The common themes of diversity and experience together with our commitment to constantly evolving and updating our manufacturing facility and equipment has enabled us to maintain our competitive edge. Our committed staff look forward to working with you on your next project.
